

TBC@UBC Network: Year in Review 2024-25

The TBC@UBC Network, supported by UBC Health, brings together health professionals and leaders, community members, academics, and policymakers to explore questions and ideas important to advancing team-based care in British Columbia.

The network strengthens province-wide efforts to improve team-based care by fostering shared learning, connecting initiatives, and leveraging UBC’s capacity in education, research, evaluation, and knowledge translation. To learn more or join the network, visit health.ubc.ca/tbc.

ENGAGED IN DIALOGUE

The TBC@UBC Network has engaged in dialogue through regular network events since 2021. Each event applies a different lens to the themes of research, education, and practice innovation. Watch the event recordings [here](#).

WHAT MEMBERS SAY

How can we include a greater variety of health professionals in team-based care opportunities?

How can academic and health sectors meet each other's needs in advancing towards the same goal?

Learning examples of how HDC is being utilized in different primary care clinics - like the Kootenay Region clinical example - was invaluable. Would love more details on how HDC works and guides clinics to achieve their data questions

¹ The topics listed highlight key themes that emerged from network discussions but do not represent the full range of topics covered.
